

Your Mat, Your Teacher, *Your Time.*

A UAE-focused acquisition strategy for culturally-native, live one-on-one yoga. Built for a mobile-first, WhatsApp-driven, expat-majority market.

MyYogaClasses.fit · UAE (AED) + India (INR) · Live 1:1 on Google Meet

PREPARED

July 2026

WINDOW

12-Week Launch, Q3 2026

PRIMARY MARKET

United Arab Emirates

00 The Strategic Bet

Win the UAE South Asian diaspora, which is 62% of the population, by offering the one thing generic fitness apps cannot: a live teacher who understands your body, your language, and your day, delivered to your living room.

This plan is grounded in the UAE market research: 88.5% expatriate population, over 80% of transactions on mobile, WhatsApp routing that cuts cost-per-acquisition by up to 40%, and a strict advertising regime under Federal Decree-Law 55 that makes health-claim discipline a competitive moat, not just a legal box.

DECISION REQUIRED BEFORE LAUNCH

Your public copy no longer advertises the free 1:1 trial (removed in PR #49), but the backend still grants it. That free session is your strongest top-of-funnel lever in this market. This plan assumes you re-activate free-trial messaging for paid acquisition. If you prefer to keep it hidden, the funnel gets re-cut around a paid-first offer. See Section 10, Decision 1.

01 Campaign Overview

Campaign name: *Your Mat, Your Teacher, Your Time*

Summary: A mobile-and-WhatsApp-first acquisition campaign that wins the UAE South Asian diaspora with culturally-native, live 1:1 yoga for real-life conditions (a stiff back, a stressful week, a pregnancy, managing diabetes) delivered from home by a teacher who speaks their language.

PRIMARY OBJECTIVE · SMART

Acquire **600 UAE free-trial signups** and convert **at least 18% (108)** to a **paid session pack** within the **12-week launch window**, at a blended **cost-per-trial under AED 45** and **cost-per-paid-customer under AED 260**.

Secondary objectives

- Build a **retargetable audience of 40,000+** across Meta and TikTok, plus a **WhatsApp opt-in list of 2,500+**.
- Establish **6 to 8 permitted micro-influencer partnerships** (South Asian wellness, mom, and expat-life creators in the UAE).
- Produce a **library of 30+ real-teacher video assets** to retire the placeholder avatars, a known conversion weakness.

02 Target Audience

The Diaspora Professional & Homemaker BEACHHEAD

Indian, Pakistani and Bangladeshi expats in Dubai, Sharjah and Abu Dhabi, ages 30 to 50, in the 25-54 working bracket that holds independent purchasing power. Time-scarce, high-stress, treats convenience as a premium. Managing a condition (back or joint pain, hypertension, diabetes, weight, hormonal health) or a life stage such as prenatal. Wants a teacher who understands the body and the cultural context, in Hindi, Hinglish, Urdu or English. Distrusts generic Western fitness apps. Values the privacy of home and feeling cared for, not just coached.

The UAE Family Caretaker SECONDARY

Parents booking **Kids** yoga, moms in **Prenatal**, adults arranging **Geriatric** sessions for elderly parents, often back in India. Family cohesion is a top regional value; this segment buys for others.

The India Warm Market TERTIARY - INR

Lower acquisition cost. Used to seed reviews, testimonials and teacher followings that feed the social proof the UAE funnel needs to convert.

Where they spend time

WhatsApp (constant), Instagram Reels (7.6M UAE users), TikTok (11.3M), Facebook diaspora and expat-mom groups (9.7M), YouTube for how-to and validation, and diaspora news portals. Notably, **Manoramaonline** (Malayali diaspora) drove the highest programmatic click-share in the research. The buying decision itself happens inside a WhatsApp conversation.

03 Key Messages

Core message: Yoga that fits your body, your language, and your day. Live, one-on-one, from home.

Message	Pain point it answers	Proof point
A teacher who speaks your language, on your mat.	Cultural disconnect with generic apps	Real Indian teachers: Hindi, Hinglish, English, Urdu
No commute. No crowd. Book in under a minute.	Time scarcity and privacy	Home plus Google Meet, mobile booking, flexible slots
Gentle, guided yoga for the way you live now.	Condition and life-stage specificity	9 focus areas including prenatal, pain relief, mental health
Try your first 1:1 session on us.	Risk and commitment aversion	Free intro session (if re-activated)
Clear prices. Buy a pack, use your credits.	Fear of hidden fees, a documented UAE trust-killer	Transparent AED packs, no subscription lock-in

Tone by channel

- **Instagram & TikTok:** warm, aspirational, cinematic. Borrow the Bollywood-style emotional and family framing the research flags as high-performing.
- **WhatsApp:** conversational, one-to-one, fast.
- **Facebook groups & diaspora portals:** community and value-led. "Finally, yoga that gets us."

COMPLIANCE GUARDRAIL · APPLIES TO EVERY ASSET

Frame conditions as **who it is for**, never as **what it cures**. "Supportive yoga for people managing diabetes," never "yoga that lowers blood sugar." Under Federal Decree-Law 55 and TDRA rules, medical or therapeutic claims by a non-licensed practice are prohibited and fineable up to AED 1M. Teachers are yoga instructors, not therapists.

04 Channel Strategy

Sequenced by funnel role. Mobile-first and vertical video by default: 81% of UAE ad clicks are on smartphones, and rich media out-clicks static banners heavily.

Channel	Role	Why it fits	Effort	Paid share
WhatsApp Business API	Convert	Every ad and CTA routes here, not to a web form. Cuts CPA up to 40%. Home for the free-trial booking and the "which condition, teacher, time" conversation.	Medium	Setup + agent
Meta + TikTok	Reach + Retarget	Vertical Reels and TikTok for cold reach; Facebook for diaspora targeting and groups. Separate ad sets	High	35 to 40%

Channel	Role	Why it fits	Effort	Paid share
per language, never machine-translated.				
Programmatic display	Cheap reach	Diaspora portals: Manoramaonline (top click-share), Khaleej Times, Gulf News. Rich media only.	Low-Med	10 to 15%
Influencer (permitted)	Trust	South Asian wellness, expat-mom, prenatal creators. Every creator must hold a UAE Media Council permit.	Med-High	15 to 20%
Google Search	Intent capture	"online yoga Dubai," "prenatal yoga at home UAE," "yoga teacher Hindi Dubai." Low volume, high conversion.	Medium	10 to 15%
Organic + YouTube	Own the story	Real-teacher clips and claim-safe tips. Fixes the placeholder-avatar weakness.	Medium	Owned

OPTIONAL BIG SWING · FOOH / CGI

Fake out-of-home CGI on Dubai landmarks pulled 30M to 300M views for other brands. A single surreal "giant serene yogi holding a pose atop the Dubai skyline" clip could deliver outsized organic awareness. Deprioritize until the funnel converts; hold as a Q4 or Ramadan-launch amplifier.

05 Content Calendar · 12-Week Launch

Week	Content piece	Channel	Notes
0	WhatsApp API + booking flow, server-side CAPI tracking, 3 landing pages (EN / AR-RTL / HI)	Owned / Tech	Blocker. Live before any paid spend. Weak tracking = 20 to 60% higher CPA.
0	Shoot 30+ real-teacher video and photo assets	Production	Retires placeholder avatars
1	Brand teaser Reels + "meet your teacher" clips	IG / TikTok organic	Warm the pixel
1–2	Launch paid: 3 hooks × 3 languages, retargeting setup	Meta / TikTok paid	First 1.5 to 2 seconds must move
2	Diaspora-portal rich-media banners live	Programmatic	Manoramaonline, Khaleej Times
2–3	Onboard 4 permitted micro-influencers	Influencer	Verify permit number before contract
3	Search campaign live	Google Ads	High-intent terms
4	Creative refresh 1; first testimonials from India warm market	Paid / Organic	Kill or scale by CPA
5–6	Condition weeks: Pain Relief, then Prenatal	All	Claim-safe copy, family framing
6	Add 2 to 4 more influencers; UGC repost stream	Influencer / Organic	
7	Creative refresh 2; retarget free-trial no-shows	Meta / WhatsApp	"Still deciding? Here is what you get"
8	Kids + Geriatric "buy for family" push	Meta / FB groups	Secondary segment
9	Mid-campaign review; reallocate budget to top channel	Internal	Shift, do not set-and-forget
10	Mental Health + Weight Loss weeks (claim-safe)	All	
11	Creative refresh 3; strongest testimonials; FOOH decision	Paid	
12	Conversion sprint: pack offers to trial-takers, close-out	WhatsApp / Email	Retarget warm list

SEASONAL OVERLAY · RAMADAN 2027

Plan a distinct flight now for Ramadan 2027 (approx. Feb to Mar). Invert dayparting to post-Iftar and pre-Suhoor windows, run a gentle-movement-while-fasting angle, and acquire high-LTV users in the 2 to 4 weeks before Ramadan while CPMs are still low.

06 Content Pieces Needed

Asset	Priority	What it contains
3 landing pages (EN / AR-RTL / HI)	Must-have	WhatsApp CTA, transparent AED pricing, real teacher photos, trust signals
WhatsApp flow + booking handoff	Must-have	Chatbot/agent script: condition → teacher → slot
9 to 12 vertical hero video ads	Must-have	3 hooks × languages, first frame in motion
30+ real-teacher clips and photos	Must-have	Replaces avatars across site and ads
Rich-media programmatic banners	Must-have	Gold, emerald, white, black luxury-minimalism; Arabic prominent
Testimonial reels	Must-have	Start with India warm market
Retargeting ad set	Must-have	"Still deciding?" plus social proof
Compliance / disclaimer block	Must-have	Health framing, permit disclosures
FOOH / CGI landmark clip	Nice-to-have	Awareness amplifier
"Gentle move for X" Shorts series	Nice-to-have	Claim-safe educational content
Email nurture sequence	Nice-to-have	For trial-takers who have not purchased

07 Success Metrics

600 FREE TRIALS IN 12 WEEKS	18% TRIAL TO PAID PACK	≤45 AED COST PER TRIAL	≤260 AED COST PER PAID CUSTOMER	2,500 WHATSAPP OPT-INS
-----------------------------------	------------------------------	------------------------------	---------------------------------------	------------------------------

Metric	Target	Tracked via
Free-trial signups (primary)	600 in 12 weeks	Supabase bookings
Trial to paid-pack conversion	≥ 18% (~108)	Razorpay + Supabase fulfilment
Cost per trial (blended)	≤ AED 45	Ad platforms + CAPI
Cost per paid customer	≤ AED 260	Blended spend / paid
WhatsApp opt-ins	≥ 2,500	WhatsApp Business
Retargetable audience	≥ 40,000	Meta / TikTok pixel
Rich-media CTR	Beat static baseline	Programmatic platform
First-session show rate	≥ 70%	Meet status + booking status

Reporting cadence: weekly performance snapshot (spend, CPT, CPA, channel split), with formal mid-point reviews at Week 6 and Week 9 to reallocate budget to the highest-confidence channel.

08 Budget Allocation

No budget was specified, so here are two tiers. Percentages apply to the paid media line; hold 10 to 15% contingency separately.

Line	Lean / Test · ~AED 12k per month	Growth / Scale · ~AED 30k–40k per month
Paid social (Meta + TikTok)	45%	40%
Influencer (permitted)	15%	20%
Programmatic display	10%	12%
Google Search	15%	13%
Production + tools	15%	15%
Strategic focus	Prove CPT ≤ AED 45 on one channel first	60 to 70% of paid on the proven winner; 15 to 20% reserved for testing incl. FOOH pilot

BILLING GATE

AED settlement on Razorpay requires **Razorpay International enabled** on the account (an open item in your billing notes). Confirm this before driving AED traffic to checkout, or paid-pack conversion fails at the final step.

09 Risks & Mitigations

#	Risk	Mitigation
1	Health claims (highest risk). Condition-based yoga can read as medical advice.	Claim-safe copy review on every asset, "who it is for" framing, disclaimer block, teachers positioned as instructors, visible /classes disclaimer.
2	Influencer permits. Using unlicensed creators after 31 Jan 2026 risks fines and blacklisting.	Verify and record each creator's permit number before contracting; require #ad plus permit number on posts.
3	Broken checkout or tracking. AED not enabled, or weak tracking, silently inflates CPA 20 to 60%.	Week-o gate: verify Razorpay International plus server-side CAPI before any spend.
4	Free-trial copy mismatch. Ads promise a free session the site hides.	Resolve Decision 1 first; align ad, landing, and backend.
5	Teacher capacity. A spike of UAE trials could outrun teacher availability in overlapping slots.	Cap daily paid spend to booked capacity; monitor slot fill before scaling.

10 Next Steps

Decisions needed from you

- **Free-trial messaging:** re-activate publicly, or keep hidden? This reshapes the funnel and the offer.
- **Budget tier** (Lean test vs Growth) and **start date**.
- **Confirm Razorpay International (AED) is live** and CAPI / server-side tracking can be set up.

Immediate action items (Week 0)

- Stand up WhatsApp Business API plus booking handoff.
- Shoot real-teacher assets to retire placeholder avatars.
- Build 3 language landing pages with RTL Arabic.
- Draft claim-safe copy plus compliance disclaimer block.
- Line up the first 4 permitted micro-influencers.

READY WHEN YOU ARE

I can draft the first-flight ad copy (English, Hindi/Hinglish, Arabic, claim-safe), write the WhatsApp booking flow, build the per-condition compliance matrix, or design the Ramadan 2027 sub-campaign. Just say which.
